CLEAN LINE ENERGY STATEMENT ON GRAIN BELT EXPRESS CASE IN MISSOURI

June 2, 2015 – We are disappointed by the Missouri Public Service Commissioners’ discussion earlier today. We will need to review the order in detail when it comes out to determine next steps for the case in Missouri. We are currently assessing all existing authorities available to move the Grain Belt Express project forward. As a couple of the commissioners noted today, the Grain Belt Express Clean Line provides substantial public benefit to Missourians by providing low-cost clean energy, new jobs, and revenues to communities across the state.

About Clean Line Energy Partners: Clean Line’s mission is to connect abundant, low-cost, renewable energy resources to areas that have a high demand for clean, reliable energy. Clean Line is developing a series of transmission projects to move renewable energy to market. For more information, please visit www.CleanLineEnergy.com.
